Farfetch Announces Third Quarter 2021 Results

- Digital Platform Gross Merchandise Value (“GMV”) two-year growth accelerates to 97% in Q3 2021; Generates \$828 million Digital Platform GMV, up 23% year-over-year
- Group GMV exceeds \$1 billion, up 28% year-over-year and more than double compared to Q3 2019
- Q3 2021 Revenue increases 33% year-over-year to \$583 million
- Q3 2021 Gross Profit Margin of 43%; Digital Platform Order Contribution Margin of 27%
- Q3 2021 Profit After Tax of \$769 million includes \$901 million non-cash benefit arising from impact of lower share price on items held at fair value and remeasurements
- Q3 2021 Adjusted EBITDA improves to \$5 million from \$(10) million in Q3 2020

LONDON, U.K. November 18, 2021 – Farfetch Limited (NYSE: FTCH), the leading global platform for the luxury fashion industry, today reported financial results for the third quarter ended September 30, 2021.

José Neves, Farfetch Founder, Chairman and CEO said: “I’m thrilled by Farfetch’s continued track record of delivering aggressive market share capture as we accelerated two-year stack Digital Platform GMV growth to 97% in the third quarter, and remain on track to achieve our goal of full year Adjusted EBITDA profitability and GMV growth above our long-term 30% CAGR target.

“We are seeing strong industry traction behind our platform strategy. Over 1,400 brands and retailers are not only listing more luxury products than ever, but also driving record media solutions revenue in recognition of our highly valuable customers. And with accelerating interest in our Luxury New Retail vision, Farfetch Platform Solutions is shaping up to revolutionize the digitization of the luxury experience and unlock significant potential for Farfetch.”

Elliot Jordan, CFO of Farfetch, said: “I am very pleased by Farfetch’s performance across the third quarter, with GMV more than doubling on a two-year basis and achieving profitability at the Adjusted EBITDA level. Our performance shows that we are navigating an unprecedented market environment, and we continue to deliver on actions to sustain Adjusted EBITDA profitability moving forwards.”

Recent Business Highlights

Digital Platform

- Digital Platform GMV growth on a two-year basis accelerated sequentially from 89% in Q2 2021 to 97% in Q3 2021, led by key luxury markets including the United States, Mainland China, United Kingdom, Middle East, Germany and Russia, which more than doubled in two years
- Third-party transactions generated 82% of Digital Platform GMV at a take rate of 30.1% in third quarter 2021
- First-party transactions grew 26% year-over-year, supported by First-Party Original which generated 4% of Digital Platform GMV in third quarter 2021
- The Farfetch Marketplace continued to offer customers an exceptionally broad selection of luxury fashion from over 1,400 sellers, as supply from both multi-brand retailers and e-concession partners continued to increase

FARFETCH

- Top 20 third-party e-concession partners expanded available stock units more than 75% year-over-year, in aggregate, contributing to the more than 10 million available stock units in third quarter 2021
- Maintained 100% retention of top 100 brand and boutique partners in last three years
- Continued to partner with brands to showcase their collections to Farfetch Marketplace visitors, generating record level of media solutions revenue for the second consecutive quarter, campaigns featured:
 - 'The Language of Prada', highlighting *Prada's* new collection, the first of a two-part partnership
 - 'Future Fantasy' digital landscape campaign highlighting *Balenciaga's* Autumn-Winter 2021 collection utilizing virtual try-on, 3D-design and Instagram filters
 - First-time partner, *Miu Miu*, highlighting their Autumn-Winter 2021 collection
 - *Dolce & Gabbana's* exclusive capsule collection, presented in comic format in partnership with creative magazine, *Kaleidoscope*
 - Livestream event for *Moncler's* latest Genius capsule collection
- Farfetch Platform Solutions ("FPS") expanded its e-concession-as-a-service integrations to include *Gucci*, now live for Harrods; also launched a global e-commerce site for *Moonboot*
- Stadium Goods partnered with *BAPE* in October 2021 for its first branded sneaker collaboration

New Guards

- Launched sustainable, digital-only brand *There Was One*, available exclusively on the Farfetch Marketplace. The brand features conscious and certified materials across collections, and is delivered in minimal packaging, which is recyclable and compostable, with limited drops to minimize overproduction
- New Guards' portfolio continued to focus on direct-to-consumer channels, which contributed to *Off-White* and *Palm Angels'* positions within the top 10 brands on the Farfetch Marketplace, while creating culturally relevant collections:
 - *Off-White* released *Off-White x Nike Dunk Low 'The 50' Collection* and launched 'I Support All Forms of Love' initiative with Trinice McNally, with all proceeds from the collection being donated to the Black LGBTQIA+ Migrant Project
 - *Palm Angels* opened store in Miami, its first directly operated store, and released first-ever beauty collaboration, with launch of fragrance collection in with *19-69*

Environmental, Social and Governance ("ESG")

- Extended Second Life service to the Middle East, enabling customers in the U.A.E., Kuwait and Saudi Arabia to trade luxury handbags for credit on the Marketplace
- Launched pre-order on the Marketplace, enabling customer to preview and order items several weeks before commercial availability, enabling brands to minimize overproduction
- Launched pilot with *Patch*, a carbon removal marketplace, in November 2021 aimed at enabling the neutralization of carbon emissions for FPS clients
- Published Farfetch's first [2020 ESG report](#), highlighting initiatives and progress made towards our 2030 sustainability goals

FARFETCH

Third Quarter 2021 Results Summary

Gross Merchandise Value (in thousands):

	Three months ended September 30,	
	2020	2021
Digital Platform GMV	\$ 674,097	\$ 828,471
Brand Platform GMV	112,327	165,290
In-Store GMV	11,416	23,553
GMV	\$ 797,840	\$ 1,017,314

GMV increased by \$219.5 million from \$797.8 million in third quarter 2020 to \$1,017.3 million in third quarter 2021, representing year-over-year growth of 27.5%. While GMV growth accelerated on a two-year basis, it increased at a lower year-over-year rate than the first half of 2021, reflecting strong comparative growth delivered in Q3 2020. Digital Platform GMV increased by \$154.4 million from \$674.1 million in third quarter 2020 to \$828.5 million in third quarter 2021, representing year-over-year growth of 22.9%. Excluding the impact of changes in foreign exchange rates, Digital Platform GMV would have increased by 20.8%.

GMV growth reflects the performance across our three reportable segments. Digital Platform GMV reflects both order growth and an increase in AOV from \$574 to \$593 across the Marketplace, due to a higher full-price mix and higher average selling price. Growth in Brand Platform GMV was driven by strong demand for New Guards' brands Autumn-Winter 2021 collections as well as a greater mix of shipments in Q3 2021 compared to the prior year. Growth in In-Store GMV was driven by additional New Guards stores opened in the last twelve months as well as strong growth from existing stores.

Revenue (in thousands):

	Three months ended September 30,	
	2020	2021
Digital Platform Services third-party revenue	\$ 157,174	\$ 185,470
Digital Platform Services first-party revenue	105,861	133,747
Digital Platform Services Revenue	263,035	319,217
Digital Platform Fulfilment Revenue	50,922	77,895
Brand Platform Revenue	112,327	165,290
In-Store Revenue	11,416	20,163
Revenue	\$ 437,700	\$ 582,565

Revenue increased by \$144.9 million year-over-year from \$437.7 million in third quarter 2020 to \$582.6 million in third quarter 2021, representing growth of 33.1%. The increase was primarily driven by 26.5% growth in Digital Platform Revenue to \$397.1 million and year-over-year growth in Brand Platform Revenue of 47.2% to \$165.3 million.

Digital Platform Services Revenue increased 21.4%, driven by 22.9% overall growth in Digital Platform GMV with Digital Platform Services first-party GMV, which includes First-Party Original, increasing 26.3% year-over-year to \$133.7 million. Digital Platform Services first-party revenue growth was primarily driven by strong performance of Browns' products on the Marketplace, in addition to high demand for New Guards brands on the Marketplace and their respective websites. This first-party revenue growth was partially offset by slower growth in third-party revenue, of 18.0%, which was

FARFETCH

primarily driven by a shift in third-party seller mix from boutique to brand partner which historically have had a lower take rate, on average.

Digital Platform Fulfilment Revenue represents the pass-through of delivery and duties charges incurred by our global logistics solutions, net of any Farfetch-funded consumer promotions and incentives. Digital Platform Fulfilment Revenue increased 53.0% year-over-year, above Digital Platform GMV growth of 22.9%. This was driven by increased pass-through costs resulting from higher duties due to a shift in regional mix of sales and continued impacts of Brexit, which we expect to be ongoing.

Brand Platform Revenue increased by 47.2% to \$165.3 million due to the same factors driving Brand Platform GMV growth.

In-Store Revenue increased by 76.6% to \$20.2 million due to the same factors driving In-Store GMV growth.

Cost of Revenue (in thousands):

	Three months ended September 30,	
	2020	2021
Digital Platform Services third-party cost of revenue	\$ 52,691	\$ 68,786
Digital Platform Services first-party cost of revenue	67,026	91,395
Digital Platform Services cost of revenue	119,717	160,181
Digital Platform Fulfilment cost of revenue	50,922	77,895
Brand Platform cost of revenue	53,589	85,018
In-Store cost of goods sold	4,443	7,291
Cost of revenue	\$ 228,671	\$ 330,385

Cost of revenue increased by \$101.7 million, or 44.5%, year-over-year from \$228.7 million in third quarter 2020 to \$330.4 million in third quarter 2021. This was at a higher rate than revenue growth and was driven by growth in Digital Platform cost of revenue and Brand Platform cost of revenue.

Digital Platform Services cost of revenue increased at a higher rate than Digital Platform Services Revenue driven by an increase in subsidized shipping and higher duties costs, as well as an increase in first party costs of goods sold driven by the growth of the first-party business.

As we continue to rely on third parties to provide shipping services, changes in their operations due to the ongoing impacts of COVID-19, as well as supply and demand for delivery services as online adoption accelerates across industries, and global supply chain challenges, may further impact our cost of revenue, and may in the future impact our growth or service levels.

FARFETCH

Gross profit (in thousands):

	Three months ended September 30,	
	2020	2021
Digital Platform third-party gross profit	\$ 104,483	\$ 116,684
Digital Platform first-party gross profit	38,835	42,352
Digital Platform Gross Profit	143,318	159,036
Brand Platform Gross Profit	58,738	80,272
In-Store Gross Profit	6,973	12,872
Gross profit	\$ 209,029	\$ 252,180

Gross profit increased by \$43.2 million, or 20.6%, year-over-year, slower than revenue growth, to \$252.2 million in third quarter 2021. Gross profit margin decreased 450 bps year-over-year to 43.3% from 47.8%, due to the softening of gross profit growth in both Digital Platform and Brand Platform.

Digital Platform Gross Profit Margin decreased 470 bps to 49.8% in third quarter 2021 from 54.5% in third quarter 2020, as Digital Platform Services cost of revenue increased at a higher rate than Digital Platform Services Revenue. This was driven by a decrease in Digital Platform third-party gross profit margin due to an increase in subsidized shipping and higher duties costs. This was combined with a decrease in Digital Platform first-party gross profit margin driven by a shorter full-price window.

Brand Platform Gross Profit Margin decreased 370 bps year-over-year to 48.6% primarily due to the implementation of sustainable production processes.

Selling, general and administrative expenses by type (in thousands):

	Three months ended September 30,	
	2020	2021
Demand generation expense	\$ 46,185	\$ 74,090
Technology expense	29,809	32,585
Share-based payments	81,840	46,134
Depreciation and amortization	54,007	64,807
General and administrative	143,349	140,195
Other items	860	104
Selling, general and administrative expense	\$ 356,050	\$ 357,915

Demand generation expense increased \$27.9 million year-over-year to \$74.1 million in third quarter 2021 and increased as a percentage of Digital Platform Service Revenue from 17.6% to 23.2%. This was driven by our investment in acquiring and engaging customers in paid channels, including our redistribution of spend in response to the impact of Apple's recent iOS privacy measures, which exhibited higher unit costs, on average.

Technology expense primarily relates to maintenance and operations of our platform features and services, as well as software, hosting and infrastructure expenses, which includes three globally distributed data centers, including one in Shanghai, which support the processing of our growing base of transactions. Technology expense increased by \$2.8 million, or 9.3%, in third quarter 2021 year-

FARFETCH

over-year. The increase was mainly driven by an increase in technology staff headcount as well as software and hosting costs to support growth.

Third quarter 2021 technology expense continued to scale as a percentage of Adjusted Revenue, decreasing from 7.7% to 6.5% year-over-year as we continue to leverage our existing infrastructure and organization.

Depreciation and amortization expense increased by \$10.8 million, or 20.0%, year-over-year from \$54.0 million in third quarter 2020 to \$64.8 million in third quarter 2021. Amortization expense increased principally due to increased technology investments, where qualifying technology development costs are capitalized and amortized over their useful lives. Depreciation expense increased primarily as a result of new stores and office leases entered into within the last twelve months.

Share-based payments decreased by \$35.7 million, or (43.6)% year-over-year in third quarter 2021 due to the reduced cost of employment related taxes and cash-settled awards, primarily as a result of the share price movement and quarterly revaluation, partially offset by additional grants of equity-settled awards, including the performance-based restricted share unit ("PSU") award granted to the Company's Founder, Chairman and CEO, José Neves in May 2021.

General and administrative expense decreased by \$3.2 million, or (2.2)% year-over-year in third quarter 2021, primarily due to a lower total employee cost per person, which was partially offset by costs of actions taken across a number of areas to support longer-term strategic initiatives including brand campaign investments and an increase in non-technology headcount. General and administrative expense decreased as a percentage of Adjusted Revenue to 27.8% compared to 37.1% in third quarter 2020 as we continued to leverage our operations base to efficiently grow Adjusted Revenue.

(Losses)/gains on items held at fair value and remeasurements (in thousands):

	Three months ended September 30,	
	2020	2021
Remeasurement (losses)/gains on put and call option liabilities	\$ (77,800)	\$ 257,549
Fair value (losses)/gains on embedded derivative liabilities	(295,279)	643,624
(Losses)/gains on items held at fair value and remeasurements	\$ (373,079)	\$ 901,173

The \$643.6 million of fair value gains on embedded derivative liabilities in third quarter 2021 were primarily driven by the decrease in our share price during the period. The fair value gains on embedded derivative liabilities in third quarter 2021 is comprised of the following revaluation gains on our convertible senior notes: (i) \$159.4 million fair value gains related to \$250 million 5.00% notes due 2025 (the "February 2020 Notes"); (ii) \$307.1 million fair value gains related to \$400 million 3.75% notes due 2027; and (iii) \$177.2 million fair value gains related to \$600 million 0.00% notes due 2030. These notes have provided strong liquidity to fund ongoing capital needs and invest in various growth initiatives. The \$295.3 million of fair value losses on embedded derivative liabilities in third quarter 2020 were primarily driven by the increase in our share price during the period. The fair value losses on embedded derivatives in third quarter 2020 comprised a \$138.2 million fair value revaluation losses related to \$250 million 5.00% convertible senior notes issued in February 2020, and

FARFETCH

a \$157.1 million fair value revaluation losses related to \$400 million 3.75% convertible senior notes issued in April 2020.

The \$257.5 million of remeasurement gains on put and call option liabilities in third quarter 2021 related to a \$81.3 million remeasurement gains in connection with Chalhoub Group's put option over non-controlling interest in Farfetch International Limited, and a \$185.0 million gain on the put and call option resulting from the November 2020 strategic agreement with Alibaba Group Holding Limited ("Alibaba Group") and Compagnie Financiere Richemont SA ("Richemont"), partially offset by a \$4.6 million loss on the put and call option over the non-controlling interest in Alanui S.r.l. and a \$4.2 million loss on the put and call option that New Guards holds over the acquisition of the remaining 40% share capital in Palm Angels S.r.l ("Palm Angels"). The \$77.8 million of remeasurement losses in third quarter 2020 related to the remeasurement gains in connection with the Chalhoub Group's put option over the non-controlling interest in Farfetch International Limited.

Profit After Tax

Profit after tax increased by \$1,306.1 million year-over-year from a loss of \$537.0 million to a profit of \$769.1 million in third quarter 2021. The increase was primarily driven by gains on items held at fair value and remeasurements, which increased \$1,274.3 million year-over-year.

EPS and Diluted EPS

Third quarter 2021 basic EPS was \$2.09 and diluted EPS was \$(0.25). Diluted EPS assumes a full conversion of the convertible notes into shares, and that the settlement of the Chalhoub liability and Farfetch China Holdings Ltd ("Farfetch China") liability held on the statement of financial position at September 30, 2021 would have been in shares, with both transactions occurring at the beginning of the third quarter, 2021. As such, diluted EPS excludes the gains on items held at fair value and interest costs related to the Chalhoub liability, Farfetch China liability and the convertible notes, net of any applicable tax, while including all outstanding equity instruments that have a dilutive impact.

Adjusted EBITDA and Adjusted EBITDA Margin

Adjusted EBITDA improved by \$15.6 million to \$5.3 million in third quarter 2021 as a result of our growth and scaling of the fixed cost base. Adjusted EBITDA Margin improved from (2.7)% to 1.1% year-over-year, primarily reflecting declines in both general and administrative expenses and in technology expense as percentage of Adjusted Revenue.

Liquidity

At September 30, 2021, cash and cash equivalents were \$1,349.7 million, a decrease of \$223.7 million compared to \$1,573.4 million at December 31, 2020. The decrease in cash and cash equivalents was primarily related to funding working capital, payments for intangible assets and \$100 million short-term variable Net Asset Value investments. This was partially offset by \$500 million cash proceeds related to the investment in Farfetch China by Alibaba Group and Richemont in August 2021.

Post Balance Sheet Events

On October 1, 2021, Tencent Holdings Limited elected to convert \$75.0 million aggregate principal amount of 5.00% February 2020 Notes. We elected to physically settle the conversion of the notes in

FARFETCH

shares, resulting in the issuance of approximately 6.1 million Class A ordinary shares on October 5, 2021.

Outlook

The following forward-looking statements reflect Farfetch's expectations as of November 18, 2021.

For Full Year 2021:

- Digital Platform GMV growth of approximately 33% year-over-year
- Adjusted EBITDA of approximately \$5 million

For Fourth Quarter 2021:

- Digital Platform GMV growth of 18% to 22% year-over-year
- Brand Platform GMV growth of 20% to 25% year-over-year
- Adjusted EBITDA of approximately \$40 million

Uncertainties resulting from the COVID-19 pandemic and the evolving nature of the situation, could have material impacts on our future performance and projections. Factors involving COVID-19 that could potentially impact our future performance include, among others:

- disruptions to our operations, fulfilment network, and shipments
- weakened consumer sentiment and discretionary income arising from various macro-economic conditions
- increased costs to support our operations
- slowing e-commerce consumer activity as vaccinations gain acceptance and populations resume to pre-pandemic activities and lifestyles

Conference Call Information

Farfetch Limited (the "Company" or "Farfetch") will host a conference call today, November 18, 2021 at 4:30 p.m. Eastern Time to discuss the Company's results as well as expectations about Farfetch's business. Listeners may access the live conference call via audio webcast at <http://farfetchinvestors.com>, where listeners can also access Farfetch's earnings press release and slide presentation. Following the call, a replay of the webcast will be available at the same website for at least 30 days.

Forward-Looking Statements

This release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements contained in this release that do not relate to matters of historical fact should be considered forward-looking statements, including, without limitation, statements regarding the anticipated continued impact of Brexit, expectations regarding our Second Life service and pre-order offering, the ongoing impact of COVID-19, future financial or operating performance, our environmental, social and governance goals, objectives and initiatives, anticipated brand campaigns, the impact of Apple's iOS privacy measures, our Fulfilment by Farfetch and global logistics objectives, planned activities and objectives, anticipated growth resulting therefrom, strategic initiatives, our growth and expected performance for the fourth quarter of 2021 and full year 2021, statements regarding our profitability, as well as statements that include the words "expect," "intend," "plan," "aim," "enable," "believe," "project," "forecast," "estimate," "may," "should," "anticipate" and similar statements of a future or forward-looking nature. These forward-looking statements are based on management's current expectations. These statements are neither promises nor guarantees, but involve known and unknown risks, uncertainties and other important factors that may cause actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements, including, but not limited to: purchasers of luxury products may not choose to shop online in sufficient numbers; the effect of the COVID-19 global pandemic on our business and results of operations; our ability to generate sufficient revenue to be profitable or to generate positive cash flow on a sustained basis; the volatility and difficulty in predicting the luxury fashion industry; our reliance on a limited number of luxury sellers for the supply of products on our Marketplace; our reliance on luxury sellers to anticipate, identify and respond quickly to new and changing fashion trends, consumer preferences and other factors; our reliance on retailers and brands to make products available to our consumers on our Marketplace and to set their own prices for such products; New Guards' dependence on its production, inventory management and fulfilment processes and systems; the operation of retail stores subjects us to numerous risks, some of which are beyond our control; our ability to acquire or retain consumers and to promote and sustain the Farfetch brand; our reliance on highly complex software, which may contain undetected errors; our ability or the ability of third-parties to protect our sites, networks and systems against security breaches, or otherwise to protect our confidential information; our reliance on information technologies and our ability to adapt to technological developments; our reliance on third-party providers to host certain websites and applications; our ability to successfully utilize our data; our ability to manage our growth effectively; the increased focus on social, environmental and sustainability matters could increase our costs, harm our reputation and adversely affect our financial results, and our ability to implement our environmental, sustainability, responsible sourcing, social and inclusion and diversity goals; José Neves, our Chief Executive Officer, has considerable influence over important corporate matters due to his ownership of us, and our dual-class voting structure will limit your ability to influence corporate matters, including a change of control; and the other important factors discussed under the caption "Risk Factors" in our Annual Report on Form 20-F filed with the U.S. Securities and Exchange Commission ("SEC") for the fiscal year ended December 31, 2020, as such factors may be updated from time to time in our other filings with the SEC, accessible on the SEC's website at www.sec.gov and on our website at <http://farfetchinvestors.com>. In addition, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements that we may make. In light of these risks, uncertainties and assumptions, the forward-

FARFETCH

looking events and circumstances discussed in this release are inherently uncertain and may not occur, and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements. Accordingly, you should not rely upon forward-looking statements as predictions of future events. In addition, the forward-looking statements made in this release relate only to events or information as of the date on which the statements are made in this release. Except as required by law, we undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise, after the date on which the statements are made or to reflect the occurrence of unanticipated events.

NOTES AND DISCLOSURES

Revisions to Previously Reported Financial Information

We have revised previously reported finance cost, loss after tax, loss per share, and non-current borrowings for both the fourth quarter and annual periods ended December 31, 2020. The revision had no impact on the Company's results for previously reported third quarter 2020 or the current quarter. Refer to our Form 6-K furnished with the SEC on May 13, 2021, for further information.

Non-IFRS and Other Financial and Operating Metrics

This release includes certain financial measures not based on IFRS, including Adjusted EBITDA, Adjusted EBITDA Margin, Adjusted EPS, Adjusted Revenue, Digital Platform Order Contribution, and Digital Platform Order Contribution Margin (together, the "Non-IFRS Measures"), as well as operating metrics, including GMV, Digital Platform GMV, Brand Platform GMV, In-Store GMV, Active Consumers and Average Order Value. See the "Definitions" section below for a further explanation of these terms.

Management uses the Non-IFRS Measures:

- as measurements of operating performance because they assist us in comparing our operating performance on a consistent basis, as they remove the impact of items not directly resulting from our core operations;
- for planning purposes, including the preparation of our internal annual operating budget and financial projections;
- to evaluate the performance and effectiveness of our strategic initiatives; and
- to evaluate our capacity to fund capital expenditures and expand our business.

FARFETCH

The Non-IFRS Measures may not be comparable to similar measures disclosed by other companies, because not all companies and analysts calculate these measures in the same manner. We present the Non-IFRS Measures because we consider them to be important supplemental measures of our performance, and we believe they are frequently used by securities analysts, investors and other interested parties in the evaluation of companies. Management believes that investors' understanding of our performance is enhanced by including the Non-IFRS Measures as a reasonable basis for comparing our ongoing results of operations. Many investors are interested in understanding the performance of our business by comparing our results from ongoing operations period over period and would ordinarily add back non-cash expenses such as depreciation, amortization and items that are not part of normal day-to-day operations of our business. By providing the Non-IFRS Measures, together with reconciliations to IFRS, we believe we are enhancing investors' understanding of our business and our results of operations, as well as assisting investors in evaluating how well we are executing our strategic initiatives.

Items excluded from the Non-IFRS Measures are significant components in understanding and assessing financial performance. The Non-IFRS Measures have limitations as analytical tools and should not be considered in isolation, or as an alternative to, or a substitute for loss after tax, revenue or other financial statement data presented in our consolidated financial statements as indicators of financial performance. Some of the limitations are:

- such measures do not reflect revenue related to fulfilment, which is necessary to the operation of our business;
- such measures do not reflect our expenditures, or future requirements for capital expenditures or contractual commitments;
- such measures do not reflect changes in our working capital needs;
- such measures do not reflect our share-based payments, income tax benefit/(expense) or the amounts necessary to pay our taxes;
- although depreciation and amortization are eliminated in the calculation of Adjusted EBITDA, the assets being depreciated and amortized will often have to be replaced in the future and such measures do not reflect any costs for such replacements; and
- other companies may calculate such measures differently than we do, limiting their usefulness as comparative measures.

Due to these limitations, Adjusted EBITDA, Adjusted EBITDA Margin, and Adjusted Revenue should not be considered as measures of discretionary cash available to us to invest in the growth of our business and are in addition to, not a substitute for or superior to, measures of financial performance prepared in accordance with IFRS. In addition, the Non-IFRS Measures we use may differ from the non-IFRS financial measures used by other companies and are not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with IFRS. Furthermore, not all companies or analysts may calculate similarly titled measures in the same manner. We compensate for these limitations by relying primarily on our IFRS results and using the Non-IFRS Measures only as supplemental measures.

FARFETCH

Digital Platform Order Contribution and Digital Platform Order Contribution Margin are not measurements of our financial performance under IFRS and do not purport to be alternatives to gross profit or loss after tax derived in accordance with IFRS. We believe that Digital Platform Order Contribution and Digital Platform Order Contribution Margin are useful measures in evaluating our operating performance within our industry because they permit the evaluation of our digital platform productivity, efficiency and performance. We also believe that Digital Platform Order Contribution and Digital Platform Order Contribution Margin are useful measures in evaluating our operating performance because they take into account demand generation expense and are used by management to analyze the operating performance of our digital platform for the periods presented.

Farfetch reports under International Financial Reporting Standards (“IFRS”) issued by the IASB. Farfetch provides earnings guidance on a non-IFRS basis and does not provide earnings guidance on an IFRS basis. A reconciliation of the Company’s Adjusted EBITDA guidance to the most directly comparable IFRS financial measure cannot be provided without unreasonable efforts and is not provided herein because of the inherent difficulty in forecasting and quantifying certain amounts that are necessary for such reconciliations, including adjustments that are made for future changes in the fair value of cash-settled share-based payment liabilities; foreign exchange gains/(losses) and the other adjustments reflected in our reconciliation of historical non-IFRS financial measures, the amounts of which, could be material.

Reconciliations of the historical non-IFRS measures presented in this press release to their most directly comparable IFRS measures are included in the accompanying tables.

FARFETCH

The following tables reconcile Adjusted EBITDA and Adjusted EBITDA Margin to the most directly comparable IFRS financial performance measure, which are loss after tax and loss after tax margin, respectively:

(in \$ thousands, except as otherwise noted)

FARFETCH

Definitions

We define our non-IFRS and other financial and operating metrics as follows:

“Active Consumers” means active consumers on our directly owned and operated sites and related apps. A consumer is deemed to be active if they made a purchase within the last 12-month period, irrespective of cancellations or returns. Active Consumers includes Farfetch Marketplace, BrownsFashion.com, Stadium Goods, and New Guards-owned sites operated by Farfetch Platform Solutions. Due to technical limitations, Active Consumers is unable to fully de-dupe Stadium Goods consumers from consumers on our other sites. The number of Active Consumers is an indicator of our ability to attract and retain our consumer base to our platform and of our ability to convert platform visits into sale orders.

“Adjusted EBITDA” means net income/(loss) after taxes before net finance expense/(income), income tax expense/(benefit) and depreciation and amortization, further adjusted for share based compensation expense, share of results of associates and items outside the normal scope of our ordinary activities (including other items, within selling, general and administrative expenses, losses/(gains) on items held at fair value and remeasurements through profit and loss, impairment losses on tangible assets, and impairment losses on intangible assets). Adjusted EBITDA provides a basis for comparison of our business operations between current, past and future periods by excluding items that we do not believe are indicative of our core operating performance. Adjusted EBITDA may not be comparable to other similarly titled metrics of other companies.

“Adjusted EBITDA Margin” means Adjusted EBITDA calculated as a percentage of Adjusted Revenue.

“Adjusted EPS” means basic earnings per share further adjusted for share-based payments, amortization of acquired intangible assets, items outside the normal scope of our ordinary activities (including other items, within selling, general and administrative expenses, losses/(gains) on items held at fair value and remeasurements through profit and loss, impairment losses on tangible assets, and impairment losses on intangible assets) and the related tax effects of these adjustments. Adjusted EPS provides a basis for comparison of our business operations between current, past and future periods by excluding items that we do not believe are indicative of our core operating performance. Adjusted EPS may not be comparable to other similarly titled metrics of other companies.

“Adjusted Revenue” means revenue less Digital Platform Fulfilment Revenue.

“Average Order Value” (“AOV”) means the average value of all orders excluding value added taxes placed on either the Farfetch Marketplace or the Stadium Goods Marketplace, as indicated.

“Brand Platform Gross Profit” means Brand Platform Revenue less the direct cost of goods sold relating to Brand Platform Revenue.

“Brand Platform GMV” and “Brand Platform Revenue” mean revenue relating to the New Guards operations less revenue from New Guards’: (i) owned e-commerce websites, (ii) direct to consumer channel via our Marketplaces and (iii) directly operated stores. Revenue realized from Brand Platform is equal to GMV as such sales are not commission based.

FARFETCH

“Digital Platform Fulfilment Revenue” means revenue from shipping and customs clearing services that we provide to our digital consumers, net of Farfetch-funded consumer promotional incentives, such as free shipping and promotional codes.

“Digital Platform GMV” means GMV excluding In-Store GMV and Brand Platform GMV.

“Digital Platform Gross Profit” means gross profit excluding In-Store Gross Profit and Brand Platform Gross Profit.

“Digital Platform Gross Profit Margin” means Digital Platform Gross Profit calculated as a percentage of Digital Platform Services Revenue. We provide fulfilment services to Marketplace consumers and receive revenue from the provision of these services, which is primarily a pass-through cost with no economic benefit to us. Therefore, we calculate our Digital Platform Gross Profit Margin, including Digital Platform third-party and first-party gross profit margin, excluding Digital Platform Fulfilment Revenue.

“Digital Platform Order Contribution” means Digital Platform Gross Profit after deducting demand generation expense, which includes fees that we pay for our various marketing channels. Digital Platform Order Contribution provides an indicator of our ability to extract digital consumer value from our demand generation expense, including the costs of retaining existing consumers and our ability to acquire new consumers.

“Digital Platform Order Contribution Margin” means Digital Platform Order Contribution calculated as a percentage of Digital Platform Services Revenue.

“Digital Platform Revenue” means the sum of Digital Platform Services Revenue and Digital Platform Fulfilment Revenue.

“Digital Platform Services Revenue” means Revenue less Digital Platform Fulfilment Revenue, In-Store Revenue and Brand Platform Revenue. Digital Platform Services Revenue is driven by our Digital Platform GMV, including commissions from third-party sales and revenue from first-party sales.

“Digital Platform Services third-party revenues” represent commissions and other income generated from the provision of services to sellers in their transactions with consumers conducted on our dematerialized platforms, as well as fees for services provided to brands and retailers.

“Digital Platform Services first-party revenues” represents sales of owned-product, including First-Party Original through our digital platform. The revenue realized from first-party sales is equal to the GMV of such sales because we act as principal in these transactions and, therefore, related sales are not commission based.

“Digital Platform Services third-party cost of revenues” and “Digital Platform Services first-party cost of revenues” include packaging costs, credit card fees, and incremental shipping costs provided in relation to the provision of these services. Digital Platform Services first-party cost of revenues also includes the cost of goods sold of the owned products.

FARFETCH

“First-Party Original” refers to brands developed by New Guards and sold direct to consumers on the digital platform.

“Gross Merchandise Value” (“GMV”) means the total dollar value of orders processed. GMV is inclusive of product value, shipping and duty. It is net of returns, value added taxes and cancellations. GMV does not represent revenue earned by us, although GMV and revenue are correlated.

“In-Store Gross Profit” means In-Store Revenue less the direct cost of goods sold relating to In-Store Revenue.

“In-Store GMV” and “In-Store Revenue” mean revenue generated in our retail stores which include Browns, Stadium Goods and New Guards’ directly operated stores. Historically, revenue realized from In-Store sales was equal to GMV of such sales as third-party sales made in certain of our directly-operated stores were accounted for within our Digital Platform segment. Starting in first quarter of 2021, such sales are accounted for within our In-Store segment.

“Third-Party Take Rate” means Digital Platform Services Revenue excluding revenue from first-party sales, as a percentage of Digital Platform GMV excluding GMV from first-party sales and Digital Platform Fulfilment Revenue. Revenue from first-party sales, which is equal to GMV from first-party sales, means revenue derived from sales on our platform of inventory purchased by us.

Certain figures in the release may not recalculate exactly due to rounding. This is because percentages and/or figures contained herein are calculated based on actual numbers and not the rounded numbers presented.

FARFETCH

About Farfetch

Farfetch Limited is the leading global platform for the luxury fashion industry. Founded in 2007 by José Neves for the love of fashion, and launched in 2008, Farfetch began as an e-commerce marketplace for luxury boutiques around the world. Today, the Farfetch Marketplace connects customers in over 190 countries and territories with items from more than 50 countries and over 1,400 of the world's best brands, boutiques and department stores, delivering a truly unique shopping experience and access to the most extensive selection of luxury on a global platform. Farfetch's additional businesses include Browns and Stadium Goods, which offer luxury products to consumers, and New Guards Group, a platform for the development of global fashion brands. Farfetch offers its broad range of consumer-facing channels and enterprise level solutions to the luxury industry under its Luxury New Retail initiative. The Luxury New Retail initiative also encompasses Farfetch Platform Solutions, which services enterprise clients with e-commerce and technology capabilities, and innovations such as Store of the Future, its connected retail solution.
